DETAILED ACTION

Applicant note: the examiner of record has changed from the previous office action.

Election/Restrictions

The restriction requirement established in the office action dated 8-23-05 is withdrawn. Claims 54-65 and 74-86 are currently pending.

Information Disclosure Statement

The references cited in the IDS document submitted on December 12, 2003 (paper no. 121203) have been considered.

Claim Objections

Claim 86 is objected to because of the following informalities: claim 86 is currently dependent upon claim 77. However, due to the subject matter recited in the claim, the claim should depend from claim 85. Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct

Art Unit: 2812

from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 54-60, 63 and 74-83 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 17-23 and 26-32 of U.S. Patent No. 6,706,632. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are recited within the above cited claims of the '632 patent.

Allowable Subject Matter

Claims 61, 64, 65, 84 and 85 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
